

GIBRAN RAIS HILMY ISKANDAR

Semarang, Indonesia | raishilmy0@gmail.com | 082135292904 | LinkedIn | Github | Portfolio

High-achieving Computer Science undergraduate with proven expertise in Mobile Application Development (Flutter, Dart). Experienced in building production-grade, offline-first mobile applications and integrating them with robust backend systems. Possesses a strong foundation in implementing on-device AI features (Google ML Kit) to deliver performant and scalable mobile solutions.

EDUCATION

Bachelor of Computer Science (Technical Informatics)	2023 - Present
Dian Nuswantoro University (UDINUS) — Semarang, Indonesia	GPA: 3.68 / 4.00 (6th Semester)
Academic Focus: Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Engineering, Relational Database Systems, Web & Mobile Development.	

RELEVANT EXPERIENCE

Mobile & Web Developer Intern	Feb 2026 - May 2026
Decodes Media — Semarang, Indonesia	3-Month Internship
- Developed STPI Mobile, a cross-platform Flutter application for active tuberculosis screening and patient tracking. - Implemented Clean Architecture and MVVM patterns with Riverpod state management, ensuring a highly modular and maintainable codebase. - Built an offline-first synchronization pipeline using Hive DB and Supabase, enabling seamless data entry in remote areas with low connectivity.	

SELECTED PROJECTS

STPI Mobile (Healthcare & Tuberculosis Screening Platform)	2026
Active Tuberculosis Case-Finding Application (Production-Grade)	Flutter, Riverpod, Hive DB, Supabase, PostgreSQL, Geolocator
- Engineered using Clean Architecture and MVVM design patterns with Riverpod state management for robust codebase scalability. - Implemented an offline-first architecture using Hive DB with a background sync queue to automatically sync local records to Supabase. - Integrated Geolocator and implemented the Haversine formula client-side to dynamically route users to the nearest tuberculosis clinic. Distributed via Firebase App Distribution. GitHub: github.com/Braneec/stpi-mobile	
Poliklinik Portal	2026
Outpatient Registration & Medical Records Management System	Laravel, MySQL, TailwindCSS, DaisyUI
- Developed a web-based Polyclinic Patient Registration & Medical Record Management Portal using Laravel and MySQL. - Implemented role-based access control (RBAC) for Doctors, Patients, and Administrators to secure medical records and schedules. - Optimized database schemas, resulting in efficient record retrieval times for outpatient scheduling pipelines. GitHub: github.com/Braneec/poliklinik-app	
WarungKu POS (Point of Sale)	2025
Smart Point-of-Sale Mobile Application	Flutter, SQLite (sqflite), Supabase, Mobile Scanner
- Engineered using MVVM pattern with clean state management, supporting local product caching and role-based access control. - Integrated camera-based barcode scanning using Mobile Scanner to enable instant product lookup and addition to cart. - Built SQLite local transaction and product details caching to ensure data accessibility during offline states. Distributed via enterprise APK installation.	
LMS Backend (Learning Management System API)	2025
High-Performance Asynchronous Course Platform Backend	Django, Celery, Redis, RabbitMQ, PostgreSQL, MongoDB, Docker
- Architected a containerized Django REST Framework backend using Docker Compose, optimized for high-traffic student portals. - Implemented asynchronous background tasks (PDF certificate generation and automated email dispatching) using Celery and RabbitMQ. - Designed a Redis caching layer for course details, reducing database query loads by over 70%.	

TECHNICAL SKILLS

Programming Languages	: Dart, PHP, JavaScript, TypeScript, Python, SQL (MySQL, PostgreSQL)
Frameworks & SDKs	: Flutter SDK, React, Next.js, Laravel, Django, Flask
Databases & Cloud	: MySQL, PostgreSQL, Supabase, sqflite, Hive DB, MongoDB, Redis
Developer Tools	: Docker & Docker Compose, Git & GitHub, RabbitMQ, Celery, Vercel, VS Code
Artificial Intelligence	: Machine Learning Foundations, Deep Learning Foundations, Generative AI Concepts, NLP Basics

CERTIFICATIONS

IBM AI Engineering Professional Certificate (13 Courses covering Deep Learning, Generative AI, RAG & LLMs — Coursera)	2026
IBM Machine Learning Specialization (6 Courses covering Supervised, Unsupervised & Deep Learning — Coursera)	2025
Introduction to Artificial Intelligence (AI) — IBM (Coursera)	2025
National Seminar speaker/participant: Web Security & Cloud — DOSCOM Udinus	2025
National Seminar speaker/participant: Leveraging Cloud & Linux — DOSCOM Udinus	2024

LANGUAGES & ACADEMIC HONORS

Languages	: Indonesian (Native), English (Basic)
Academic Honors	: Dean's List / Consistent Academic Honors (GPA 3.68/4.00)
